

ART OF THE MASTERS PROGRAM
PRESENTS THE LIFE & WORK OF
EDGAR DEGAS

> Edgar Degas was a French artist whose unique approach to composition, drawing, and capturing of movement made him one of the masters of modern art in the 19th century. Degas is not an easy artist to classify. He was a painter, sculptor and eventually a photographer. He is usually grouped with the impressionists, being that he exhibited with them but his revolutionary use of pastels and his dislike of painting directly from nature produced a style that no other impressionist had seen before.

> During our hands-on session, participants will have the opportunity to choose from several Degas sketches and bring them to life using oil pastels and pencils.

Afterwards, all pieces will be framed. ***What a great way to start the New Year!***
